

Extended Warranty

Enhance the value of your Calix platform investment with the Calix Extended Warranty program. The Extended Warranty Program can make a big impact in your day-to-day network operations by helping you:

- Simplify network equipment replacement activities
- Provide greater flexibility with your deployment, maintenance and sparing processes
- Maintain predictability with your expenses and avoid unforeseen impacts to your operating budget

Protect Your Investment

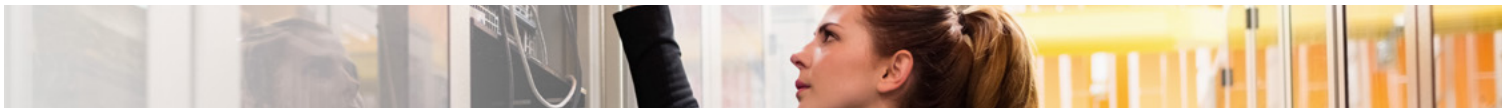

The Calix Extended Warranty program lets you add extended warranty coverage to applicable products to provide you long term, low cost, seamless coverage for your Calix investment. With a Calix Extended Warranty, you're protected from unexpected repair costs and you can rest assured that you'll continue to get superior coverage on your Calix equipment. You can purchase Extended Warranty at the time of the original equipment purchase or after your purchase to enable up to a maximum of 10 years of coverage.

We recommend purchasing Extended Warranty at the time you buy your equipment because that lets you enjoy the lowest, most predictable cost of ownership compared to the high-cost alternatives like buying replacements, emergency repairs, or stocking large numbers of spares.

If your equipment has come off the Calix standard warranty or want to make sure your equipment stays covered and eliminate the risk of out-of-warranty repair costs to your budget, we also provide you the flexibility to purchase Extended Warranty after the original equipment purchase date in one-year increments. And while we also offer out-of warranty product repairs upon request, in many cases, having an Extended Warranty in place pays for itself in as few as two out-of-warranty repairs.

Extended Warranty Benefits

- Continuous and uninterrupted hardware protection for Access Products – a full 10 years when added to the 5-year standard warranty, and for Premises Products up to 5 years when added to the 1-year standard warranty. You can match your warranty coverage with the expected equipment deployment life
- No hassle, streamlined Return Exchange Program (product replacement, product shipping, handling, etc.) using the online Calix portal
- Online tracking allows you complete visibility to your RMA status
- Additional discount for selecting Extended Warranty coverage at the time of equipment purchase – ensures predictable coverage at the lowest warranty coverage costs
